Summary

I am a recent graduate from Ryerson University's Computer Science program. During my time at MoneyKey I went from a call centre representative to a full stack developer, using React.js and Spring Boot. I built an application that helped generate new loan documents into our sql database as well as built an application that verified our customer's promocodes which helped fight fraud. In my internship I participated in technology demos and scrum meetings and I can't wait to be apart of a team once more!
